Work Experience

Keysight Technologies Malaysia

Software Applications Development Intern

January 2024 – May 2024

- Developed and maintained an internal PDF scanning tool using Python.
- Successfully upgraded the tool from Python 3.7 to Python 3.12, and utilised more advanced libraries and multiprocessing to improve the speed of scanning multiple PDF files.

Projects

Final Year Project – Blood Donation Event Advertisement System

- Developed a system for advertising and registering for blood donation events across Malaysia using SolidJS as the frontend, Rust as the backend and PostgreSQL as the database.
- Used Shadcn port for SolidJS, Tanstack, TailwindCSS, and integrated the Google Maps API in the frontend, and Axum to create the backend API.

Automotive Machinery Supply Chain Management System

- Utilised blockchain technology to develop a system to track the supply chain for machinery used to produce automotive parts using NextJS, Solidity and Neon PostgreSQL database provider.
- Used Hardhat and Metamask for blockchain functionalities, Shadcn, AceternityUI and TailwindCSS for UI elements, and DrizzleORM for database queries.

Technical Skills

Languages: TypeScript, JavaScript, HTML, CSS, Java, C++, C, Rust, Assembly (TASM), Python, R, SQL, Solidity

Technologies: React, SolidJS, TailwindCSS, NextJS, Axum, Git, Cisco Packet Tracer, LabVIEW

Education

Asia Pacific University of Technology and Innovation – Foundation in Computing

CGPA: 3.96 / 4.0

March 2021 – December 2021

Asia Pacific University of Technology and Innovation – BSc (Hons.) in Computer Science

CGPA: 3.73 / 4.0

March 2022 – Present

- Vice Chancellor's List for years 2022 and 2023 by obtaining a CGPA of 3.7 or higher

Co-Curricular Activities

Vice President of the Communications Society Student Chapter of the IEEE Asia Pacific University of Technology & Innovation Student Branch (IEEE APU SB)

Volunteered to be an assistant during the Engineer's Day event 2023 in Asia Pacific University of Technology & Innovation

Participated in APU Battle of Hackers 2021, a CTF (Capture the Flag) competition that tests the participants' skills in various areas of cybersecurity
